1. The following is an examiner's statement of reasons for allowance:

With regards to pending claims rejected under the double patenting rejection between the instant application and the patent, as noted by applicant in the interview and remarks of the response of 11/17/2003, the instant application claims call for a motive device for move/rotating the superconducting element which levitates the magnetic mixing element. It is noted that a interactive coupling between with the superconductor device and the mixing element will cause the mixing element to move/rotate as the superconductor is move/rotated. In contrast, the claims in the patent 6416215 require a superconducting element levitating device to lift the mixing element and a separate motive device to rotate the mixing element. Accordingly, in such a distinction, the double patenting rejection is withdrawn.

Additionally, a search of the prior art has failed to show or render obvious a combination of a rotation device in connection with a moving, cooled, superconducting levitation element with a levitated mixing element in the vessel for pumping or mixing a fluid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
